Executive Attrition Diagnostic & Retention Strategy

Executive Presentation & Delivery Guide: Exact Scripts, Timing & Live Power BI Demo

Target Runtime: 8:30 - 9:30 Mins	Deck: HR_Executive_Attrition_Presentation.pptx (8 Slides)	Model: hr_employees.pbix

Executive Delivery Protocol: A structured, step-by-step presentation roadmap. You will present Slides 1 to 4 in PowerPoint, transition into Power BI using a single `Alt + Tab` for a focused 3-click live demonstration, and return to PowerPoint to deliver the strategic action plan.

1. Pre-Presentation Presence & Delivery Preparation

Before beginning your presentation, execute these three executive delivery standards:

- **Controlled Breathing (3 Cycles):** Inhale 4 seconds -> Hold 4 seconds -> Exhale 4 seconds. Calms speech cadence and stabilizes vocal resonance.
- **Physical Hand Anchor:** Rest both palms flat on the podium/desk, or hold a slide clicker firmly. Projects steady, grounded executive presence.
- **Eye Contact Distribution:** Direct your gaze evenly across the room, focusing across the center and sides of the executive committee.

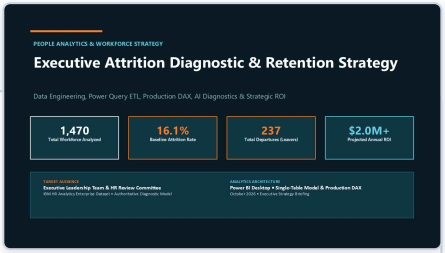

2. Screen-Switching Master Timeline

Time	Active Window	What to Show	Delivery Focus & Action
00:00 - 00:45	PowerPoint (Slide 1)	Cover Slide (4 Badges)	Introduce project title, 1,470 staff and 16.1% baseline turnover.
00:45 - 01:45	PowerPoint (Slide 2)	Data Engineering & Power Query	Explain 0 nulls audit, pruned 3 columns, and engineered 4 M-bands.
01:45 - 02:45	PowerPoint (Slide 3)	Problem Scale & Objectives	Explain $7M-$11M replacement burden and 56% R&D loss volume.
02:45 - 03:45	PowerPoint (Slide 4)	DAX Calculation Engine	Show safe division (`DIVIDE`), Overtime `CALCULATE`, sort key.
03:45 - 07:15	**Power BI Desktop**	**hr_employees.pbix**	**[ALT + TAB]**: Tab 1 (Overview): Sales & OverTime • Tab 2 (Drivers): AI Tree & Key Influencers • Tab 3 (Pay & Careers): 2-Yr Cliff & Low Pay.
07:15 - 08:00	PowerPoint (Slide 5-6)	Visual Summaries & AI Tree	**[ALT + TAB]**: Quick 30-sec recap bridging into the action plan.
08:00 - 09:15	PowerPoint (Slide 7)	Strategic Action Plan	Present 3 Pillars (Overtime Cap, Q1 Pay, Mentorship) & $2.0M ROI.
09:15 - 09:45	PowerPoint (Slide 8)	Pure "Thank You"	State closing sentence, smile, and invite committee questions.

Phase 1: Foundation on Slides (Slides 1 to 4)

Screen: PowerPoint Slide Show Mode (F5)

Slide 1: Front Page / Executive Title Cover (00:00 - 00:45)

ACTION Stand tall, rest hands on podium, take one slow breath before speaking.

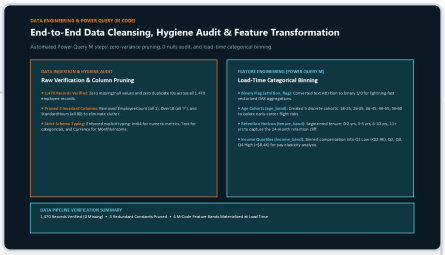

"Good morning, everyone. Today, I am presenting our **Executive Attrition Diagnostic & Retention Strategy**."

"Employee turnover is not just an HR metric—it is a significant operational and financial threat. Across our organization of **1,470 employees**, we are facing a baseline attrition rate of **16.1%**, representing **237 departures**."

"Before we step into the live interactive dashboard, I want to show you how this data was cleaned, validated, and modeled in Power BI to ensure 100% calculation accuracy."

[PAUSE 2 SECONDS - CLICK TO SLIDE 2]

Slide 2: Data Engineering & Power Query ETL (00:45 - 01:45)

ACTION Point at left card, then right card. Speak in a steady, measured cadence.

"Data integrity is the foundation of this analysis."

"In **Power Query**, we first conducted an automated data audit across all **1,470 records**, confirming **zero missing values** and **zero duplicate IDs**."

"Next, we pruned three invariant columns—`EmployeeCount`, `Over18`, and `StandardHours`—because they contained identical, constant values across all rows, providing zero analytical insight."

"On the right card, we engineered four key custom attributes using M-code: a binary **`attrition_flag`** for rapid vectorized calculation, and discrete demographic brackets for **`age_band`**, **`tenure_band`**, and **`income_band`**."

"This pre-categorizes continuous data directly at load time for maximum efficiency."

[PAUSE 2 SECONDS - BREATHE - CLICK TO SLIDE 3]

Slide 3: Project Foundation & Problem Scale (01:45 - 02:45)

ACTION Point directly at the cyan `$7.1M - $11.8M` badge.

"Here is the true scale of the problem."

"Industry benchmarks show that replacing a specialized knowledge worker costs between **50% and 150% of their annual salary** in recruitment fees, advertising, interview cycles, and lost team velocity."

"For our organization, losing 237 employees creates a cumulative financial burden between **$7.1M and $11.8M**."

"Crucially, **56% of all departures occur in Research & Development** (133 exits), draining our core engineering capabilities and intellectual property."

"Our objective is to move from reactive exit interviews to a proactive, evidence-based retention roadmap."

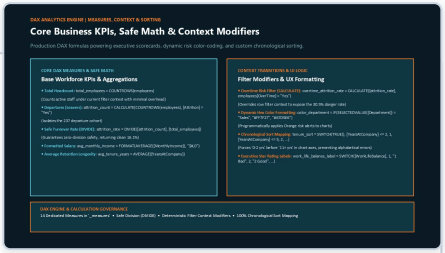

[PAUSE 2 SECONDS - CLICK TO SLIDE 4]

Phase 2: DAX Engine & Live Dashboard Demonstration

Transition: PowerPoint Slide 4 -> Live Power BI (hr_employees.pbix)

Slide 4: DAX Analytics Engine (02:45 - 03:45)

ACTION Point at the `DIVIDE` formula on the left card.

"To power our interactive reporting, we built a centralized semantic layer with **14 explicit DAX measures**."

"On the left, our core KPIs use safe division—via the **`DIVIDE` function**—which automatically protects against divide-by-zero crashes when users filter down into small sub-cohorts."

"On the right, we used `CALCULATE` to dynamically isolate high-risk groups, such as our **Overtime attrition rate**."

"We also engineered dynamic hex color measures so that the dashboard programmatically highlights danger zones in orange."

"Now, let's step directly into the live Power BI dashboard to see these dynamics in action."

>>> KEYBOARD ACTION: PRESS [ALT + TAB] ONCE TO SWITCH TO POWER BI <<<

Live Power BI Demonstration: Targeted 3-Step Demo (03:45 - 07:15)

Navigate across the 3 exact dashboard tabs at the bottom of Power BI:

Step 1: Tab 1 — Overview (03:45 - 04:45)

DEMO Point at top KPI cards: "Here on our Overview tab, we see our enterprise baseline: 1,470 total employees, 237 exits, a 16.1% turnover rate, 7.0 years average tenure, and $6,503 average monthly salary."

CLICK Click the `Department = "Sales"` slicer / bar chart.

"When I click on Sales, notice the attrition rate immediately jumps to **20.6%**—our highest departmental departure rate."

CLICK Click the `OverTime = "Yes"` slicer.

"Now look what happens when we filter by employees working mandatory OverTime: attrition explodes to **30.5%**—nearly **triple** the baseline rate! Overtime is our single biggest operational turnover catalyst."

CLICK Unclick the slicers to reset back to baseline.

Step 2: Tab 2 — Drivers (04:45 - 05:45)

CLICK Click the bottom tab: **Drivers**.

DEMO Point at the **Key Influencers Visual**:

"On our Drivers tab, we leverage Power BI's machine learning visual. The model ran logistic regression across all 40 attributes and proved that working OverTime is the **#1 odds multiplier (2.93x)**, followed by Sales Representative and Lab Tech roles."

DEMO Point at the **Decomposition Tree Visual**:

"Our Decomposition Tree traces where the 237 leavers originate: branching from R&D and Sales down into specific job roles and overtime strain, demonstrating exactly how exits cluster."

Step 3: Tab 3 — Pay & Careers (05:45 - 07:15)

CLICK Click the bottom tab: **Pay & Careers**.

DEMO Point at the **'Attrition drops sharply after the first two years'** chart:

"Here is our critical structural insight: **The 2-Year Retention Cliff**. Attrition peaks at nearly **30% in years 0 to 2**, but drops in half to **13.8%** once employees stay past 24 months."

DEMO Point at the **'Lowest-paid quarter leaves nearly 3x as often'** chart:

"We also see that our lowest-paid quartile leaves at almost 3x the rate of top earners. This confirms that early-career burnout and entry pay compression are our true vulnerabilities. Let's return to our presentation for our strategic intervention."

>>> KEYBOARD ACTION: PRESS [ALT + TAB] ONCE TO RETURN TO POWERPOINT <<<

Phase 3: Executive Action Plan & Confident Close

Screen: PowerPoint Slide 7 & Slide 8

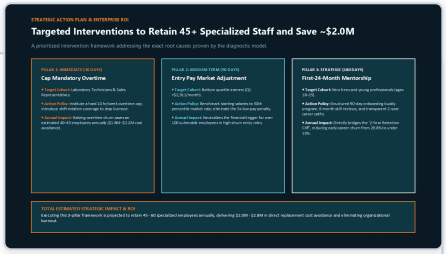

Slide 5 & 6 Transition Note (07:15 - 07:30)

Since you just demonstrated the live visuals in Power BI, you can advance smoothly past Slides 5 & 6 in 10 seconds:

> "As seen in our live cockpit, the visual data and AI decomposition trees clearly prove that turnover is concentrated in a predictable risk cluster. This allows us to prescribe a highly targeted action plan."

Slide 7: Strategic Action Plan & Enterprise ROI (07:30 - 09:15)

ACTION Point at Pillar 1, Pillar 2, Pillar 3, then the bottom ROI banner.

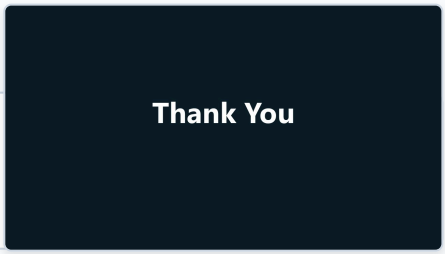

> "Based on these empirical findings, we propose a prioritized, 3-pillar intervention roadmap:"
>
> "**Pillar 1: Immediate (30 Days) — Cap Mandatory Overtime.** We institute a strict 10 hour per week cap and introduce shift-rotation for Lab Techs and Sales Reps. Halving overtime churn saves an estimated 40 to 45 staff annually."
>
> "**Pillar 2: Medium-Term (90 Days) — Entry Pay Market Adjustment.** Benchmark entry-level starting salaries for our bottom quartile earners to the 50th percentile market rate, eliminating the 3x low-pay departure penalty."
>
> "**Pillar 3: Strategic (180 Days) — First-24-Month Mentorship.** Deploy a structured 90-day onboarding buddy program and transparent 2-year career paths to directly bridge the 2-Year Retention Cliff."
>
> "**The Bottom-Line ROI:** Executing this roadmap is projected to retain **45 to 60 specialized employees annually**, delivering **$2.0M to $2.8M in direct replacement cost avoidance**."

[PAUSE 2 SECONDS - ADVANCE TO SLIDE 8]

Slide 8: Pure "Thank You" Slide (09:15 - 09:45)

ACTION Look up at the audience, smile, and deliver your closing line with calm confidence.

> "**Thank you for your time and leadership. I am now happy to open the floor to any questions.**"

Executive Presentation Handling & Recovery Techniques

Scenario	Executive Action	Recommended Script
Momentary Pause or Transition	Take a slow sip of water (projects thoughtfulness and composure). Look at the slide.	*"The single most important number on this screen is..."* (Read the boldest number on the slide).

Dashboard Slicer Reset	Click the "Reset" button in the corner to return to default.	*"Let's reset the slicers back to our organizational baseline."*
Executive Question During Slide Flow	Nod your head slowly and acknowledge the point.	*"That is an excellent point. Our data confirms that [repeat key stat]. Let me address that in detail right after the summary."*

```
EXECUTIVE POCKET CHEAT SHEET — PRESENTATION & LIVE DEMO CUES:
1. Slide 1 (Cover): "1,470 staff, 16.1% churn, $7M-$11M risk exposure."
2. Slide 2 (ETL): "0 nulls, 3 constants pruned, 4 M-code bands."
3. Slide 3 (Scale): "R&D loses 133 staff (56% of exits) — critical IP threat."
4. Slide 4 (DAX): "Safe DIVIDE prevents crashes, dynamic OverTime CALCULATE."
>>> [ALT+TAB -> POWER BI] <<<
5. PBI Tab 1 (Overview): Click Sales (20.6%), Click Overtime (30.5%) -> TRIPLE risk.
6. PBI Tab 2 (Drivers): Point at Key Influencers (Overtime #1 at 2.93x) and Decomposition Tree.
7. PBI Tab 3 (Pay & Careers): Point at 2-Year Retention Cliff & Lowest-Paid Quarter departure
penalty.
>>> [ALT+TAB -> POWERPOINT] <<<
8. Slide 7 (ROI): "3 Pillars: Overtime Cap, Pay Adjustment, Mentorship -> $2.0M ROI."
9. Slide 8 (End): "Thank you. I am now open to your questions."
```
